About me

My name is Patrik Miron, I'm 25 years old. I am from Romania, Oradea. I am a sociable, responsible guy and I like to work not only alone, but also in a wonderful team.

As a highly skilled and motivated individual, my abilities are well-suited for contributing significantly to success. My proficiency, adaptability, and strong work ethic make me a valuable asset to any team.

I graduated the highschool and i did 2 years of engineering University. I stopped because came pandemic and i decided to stop it because I couldn't imagine myself being engineer with online University, so I decided to start a course of Front-end Development (HTML, CSS, Grid, Flexbox, JavaScript, jQuery, Express, Node, Git, React, PostgreSQL) which i already complete it with grade: 10/10 and of course I have a certificate, and a course of Back-end Development (PHP, MYSQL, LARAVEL). I obtained the baccalaureate and obtained best experienced qualifications in Digital Competences for HTML, Microsoft Office's pack (Word,Excel,Acces,Powerpoint, Turbo Pascal).

Professional experience
